

# Blue Cross and Blue Shield of North Carolina NetResults Formulary – Updated as of 10/01/21

January 2022

Please consider talking to your doctor about prescribing lower tier medications whenever possible, which may help reduce your out-of-pocket costs. This list may help guide you and your doctor in selecting an appropriate medication for you.

The medication formulary is regularly updated. Please visit [www.bcbsnc.com](http://www.bcbsnc.com) for the most up-to-date information.

# Member guide to covered medications on the NetResults Formulary

## Introduction

Blue Cross and Blue Shield of North Carolina (Blue Cross NC) is pleased to present the 2022 NetResults formulary. This formulary is a list of medications covered by Blue Cross NC and is an open formulary. Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe medications on this list, at the lowest tier, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.

For a more complete listing of medication coverage and costs, you may use our medication search at [www.bcbsnc.com](http://www.bcbsnc.com). Please refer to your member guide for detailed information regarding your pharmacy benefits, including your benefit design, out-of-pocket costs, prior review and restricted access medication requests, and applicable exclusions. You may also call Blue Cross NC Customer Service at the number listed on the back of your ID card to verify prescription medication benefits.

## How medications are selected

Medications on this list are selected based on the recommendations of a Pharmacy & Therapeutics Committee made up of physicians and pharmacists from throughout the country. The committee reviews medications regulated by the U.S. Food and Drug Administration (FDA) on a quarterly basis.

The NetResults Formulary is subject to change at any time. There are varying reasons changes are made to the medications listed in the member guide to covered medications:

- The tier level of a medication included on the medication list may increase (change to a higher tier) when an FDA-approved bioequivalent generic medication becomes available.
- Newly marketed prescription medications may require prior authorization until the Pharmacy & Therapeutics Committee has had an opportunity to review the medication, to determine how the medication will be covered and which tier will apply based on safety, efficacy and the availability of other products within that class of medications.
- Change in the cost of the medication and/or in the classification of the medication by the U.S. Food and Drug Administration (FDA) or nationally-recognized medication databases (e.g., Medispan).

## Formulary tiers

Tier placement of prescription medications in the NetResults Formulary may be determined by: the effectiveness and safety of the medication, the cost of the medication, and /or the classification of the medications by the U.S. Food and Drug Administration (FDA) or nationally-recognized medication databases (e.g., Medispan). The plan design determines the member's payment obligation.

Definitions for the five-tiered benefit structure:

- **Tier 1:** The prescription medication tier which consists of the lowest cost tier of prescription medications, most are generic.
- **Tier 2:** The prescription medication tier which consists of medium-cost prescription medications, most are generic, and some brand-name medications.
- **Tier 3:** The prescription medication tier which consists of high-cost prescription medications, most are brand-name prescription medications.
- **Tier 4:** The prescription medication tier which consists of the higher-cost prescription medications, most are brand-name prescription medications.
- **Tier 5:** The prescription medication tiers which consist of the highest-cost prescription medications, most are specialty medications.

**MN:** This category of medication does not have a tier designation and requires Prior Authorization. Coverage for these medications will be dependent on whether the drug specific medical criteria is met and the provider demonstrates that other covered alternatives do not meet the clinical needs of the member. Medications that are approved will be covered in Tier 4 for traditional medications and Tier 5 for specialty medications.

**NOTE:** Drugs that are indicated with a \* next to the tier in the Prescription Drug List denote group specific coverage. Please register and login in to MyPrime.com to use the Find Medicines search tool for specific coverage.

## Generic medications

**In most cases, choosing a generic medication equivalent, when available, will mean significant savings to you.** We encourage you to discuss with your physician whether a generic alternative is available as these medications represent safe, effective treatment options. Especially for medications that are taken daily and refilled frequently, you will experience the long-term savings of a lower medication payment month after month. **If you choose a brand name prescription medication and a generic equivalent is available, you may be subject to a reduced benefit and a higher out-of-pocket expense.**

## Prior review, restricted-access, and quantity limitations

Certain medications may be subject to prior review, quantity limitations, or restricted-access programs. The Blue Cross NC's P&T Committee made up of physicians and pharmacists reviews the clinical criteria for these programs.

- **Prior Review (PA)\*:** Your benefit plan may require prior review for certain medications. This means that your doctor will need to submit a prior review request for coverage of these medications, and the request will need to be approved by Blue Cross NC, before the medication will be covered under your plan. In some cases coverage will require that the member has a unique, clinical need for the medication that cannot be met by other medications. These medications are marked "MN" in the tier column of the formulary. In these cases, coverage for these medications will be dependent on whether the drug specific medical criteria is met and the provider demonstrates that other covered alternatives do not meet the clinical needs of the member. Providers will need to confirm that the member has tried other alternatives or that these alternatives are likely to be detrimental to the members health. For the medications listed in this document, if a prior review is commonly required, it will generally be noted next to the medication with a dot under the prior review column. Some plans may have prior review on additional medications beyond those noted in this document. Refer to your benefit plan materials for details about your particular benefits.
- **Restricted Access/Step Therapy(RA/ST)\*:** For coverage of restricted-access medications, Blue Cross NC requires that the member has tried non-restricted-access formulary medications first. Coverage for restricted-access medications may be provided without the use of non-restricted-access medications if the provider certifies in writing that the member has previously used non-restricted-access medications and the non-restricted-access medications have been detrimental to the member's health or have been ineffective in treating the same condition and, in the opinion of the provider, are likely to be detrimental to the member's health or ineffective in treating the condition in the future. Clinical rationale and documentation for restricted-access medication requests may be required. For the medications listed in this document, if a medication is restricted access and requires review, it will generally be noted next to the medication with a dot under the restricted access column.
- **Quantity Limits (QL)\*:** Quantity and days supply limits help encourage medication use as intended by the FDA. Quantity and Days Supply limits are placed on medications in certain medication categories. For the medications listed in this document, if a quantity limit applies, it will generally be noted next to the medication with a dot under the quantity limits column. Limits may include: quantity of covered medication per prescription, quantity of covered medication in a given time period, or coverage only for members within a certain age range. If your doctor prescribes a greater quantity of medication than what the quantity limit allows, you can still get the medication. However, you will be responsible for the full cost of the prescription beyond what your coverage allows. Certain medications may also have limitations on the quantity and days' supply coverage. Quantities in excess of the quantity limit must be reviewed and approved by Blue Cross NC before coverage can be authorized for amounts in excess of the limits.

Criteria – This tells you what conditions you have to meet for a medication to be covered under your benefits. Some of this may be technical medical information, but it's available for you to read and discuss with your provider. Criteria is available at the following website: [www.bcbsnc.com/content/services/formulary/rxnotes.htm](http://www.bcbsnc.com/content/services/formulary/rxnotes.htm).

\*Please see "Covered Services" and "Glossary" in your benefit booklet for more information.

**PLEASE NOTE:** If you change your health plan, your provider may need to tell us again that you have met our clinical criteria under your new plan.

The FDA is responsible for approving medications for use based on clinical data proving the medication is safe and effective for that specific use. Blue Cross NC's prior review, restricted-access, non-formulary exceptions and quantity limitations programs follow FDA-approved uses for these medications.

## Other coverage considerations

Most prescription medication benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those medications you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some plans may exclude coverage for certain agents or medication categories, like those used for erectile dysfunction or weight loss.

**Over-the-counter exclusions:** Your benefit plan may not provide coverage for prescription medications that have an over-the-counter version. You should refer to your benefit plan material for details about your particular benefits.

**Compounded medications:** Your benefit plan may not provide coverage for compounded medications. Please see your plan materials or call the number on the back of your ID card to determine whether compounded medications are covered and/or verify your payment amount.

**Repackaged medications:** Repackaged versions of medications already available on the market are not covered.

**Non-FDA Approved Medications:** Medications that have not received FDA approval are not covered.

**Remember, medication decisions are between you and your doctor.** Only you and your doctor can determine which medication is right for you. Discuss any questions or concerns you have about medications you are taking or are prescribed with your doctor.

## Specialty medications

Specialty medications, as classified by Blue Cross NC, are used in the treatment of medical conditions such as hepatitis, hemophilia, multiple sclerosis and rheumatoid arthritis. Specialty medications may be oral, topical or injectable medications that can either be self-administered or administered by a health care professional. Most specialty medications can be found on Tier 5. Some of these specialty medications will need to be filled at a participating specialty pharmacy in our network. These medications are identified in the specialty column of the formulary guide.

Note that some medication classes may be excluded by some plans and therefore may not be covered under your pharmacy benefit. Your plan may have a different coverage level for self-administered specialty medications. If you have questions about your coverage for specialty medications or your prescription medication benefit, call the number on the back of your ID card.

## Affordable Care Act

Please note, some medications may have limited or \$0 cost-sharing under the Affordable Care Act (ACA); examples of categories of medications that may be subject to limited or \$0 cost share include aspirin, breast cancer preventive, HIV prevention, fluoride supplements, folic acid supplements, iron supplements, tobacco cessation, immunizations (including but not limited to, influenza, shingles and pneumonia), and some contraceptive medications and devices. You may find additional information about these medications at: [www.bluecrossnc.com/preventive](http://www.bluecrossnc.com/preventive). If you do not find the medication you are searching for, contact the customer service number on the back of your Blue Cross NC ID card to find out if the medication is available over the counter or is covered under your medical benefit.

## Diabetic and Respiratory Supplies

Please note, some diabetic and respiratory supplies may pay either with a 25% coinsurance or a group determined coinsurance or copay amount. Your plan benefit will supersede any of the tier information in this document, in the case of contradictions within this publication. If you have any additional questions about your plan benefit for diabetic or respiratory supplies, please contact the customer service number on the back of your Blue Cross NC Id card.

## Using the member guide to the NetResults Formulary

The Medication List is organized into broad categories (e.g., ANTI-INFECTIVE AGENTS). The graphic below shows the information that is provided in each column of the medication list and is an example only. Please use the medication search function to find current information for medications on the medication list.

1 Drug Name	2 Drug Tier	3 Specialty	4 Prior Review	Restricted Access	Quantity Limits
<b>ANTI-INFECTIVE AGENTS</b>					
<b>PENICILLINS</b>					
AMOXICILLIN- amoxicillin (trihydrate) chew tab 125 mg	4				
AMOXICILLIN- amoxicillin (trihydrate) chew tab 250 mg	4				
<b>amoxicillin (trihydrate) cap 250 mg</b>	1				
<b>amoxicillin (trihydrate) cap 500 mg</b>	1				
<b>amoxicillin (trihydrate) for susp 125 mg/5ml</b>	1				
<b>amoxicillin (trihydrate) for susp 200 mg/5ml</b>	1				
<b>amoxicillin (trihydrate) for susp 250 mg/5ml</b>	1				
<b>amoxicillin (trihydrate) for susp 400 mg/5ml</b>	1				
<b>amoxicillin (trihydrate) tab 500 mg</b>	1				
<b>amoxicillin (trihydrate) tab 875 mg</b>	1				
<b>amoxicillin &amp; k clavulanate for susp 200-28.5 mg/5ml</b>	1				

- 1 The first column of the chart lists the medication name. Generic medications are listed in lowercase **boldface**. Brand name medications are capitalized.  
Separate medication entries are required for some dosage forms such as extended-release and delayed-release.
- 2 The second column indicates the Tier level.
- 3 The third column indicates if the medication is a Specialty medication and needs to be filled at a participating specialty pharmacy in our network.
- 4 The next three columns indicate the Pharmacy Program(s) that apply to the prescription medication (e.g., Prior Review, Restricted Access and Quantity Limitations). If an indicator is present in the column(s), then the Pharmacy Program applies.

## Abbreviation key
